My Business Philosophy

Preparing for that next step in life isn't always easy. New clients approach me with similar concerns: increasing demands on their time and resources prevent them from taking appropriate steps to make positive financial outcomes possible. I'll guide you through the team-based, process-driven approach to financial preparedness that has helped many of my clients. Often, my clients say the greatest benefit from our collaboration is the clarity and financial peace of mind they've come to enjoy as a result. Contact me today to learn how you may benefit from putting our team to work for you.

Professional Qualifications

- B.S., Electrical Engineering, University of Memphis (1986)
- MBA, University of Dallas (1992)
- Series 7 and 63 securities registrations
- Financial Planner offering fee-based financial planning through MML Investors Services, LLC.

Organizations

Working as a financial advisor since 2001 has given me the perspective of helping individuals through good markets and bad. I worked as an engineer for 14 years before following my passion of helping people reach their personal and business goals. My parents both have Alzheimer's Disease, so my amazing wife, Cathy, and I moved back to my childhood home to be available for their care. Since 2017, I work in two offices - Franklin and Dyersburg, TN. I enjoy most sports with a ball, but my favorites are racquetball, table tennis, and bowling. My twins, Mary and Clay, are living adult lives to the fullest. The personal successes I have achieved are because I am rooted in Christ. My life's goal is to reflect Him.
