

# Capital Markets Snapshot

Week ending August 18, 2023

All three major equity indices were down by more than 2.00% this week, with the S&P and Nasdaq declining for the third consecutive week. This came despite an upside surprise to U.S. July Retail Sales which reported increases in 9 out of 13 categories. Some of the market strain came on concerns that China's slowing economic growth could put pressure on the global economy. Following disappointing economic releases this week, China's central bank cut rates for the second time in three months.

## Fixed Income Markets Overview

- Yields continued to climb higher with the 10-year U.S. Treasury breaking above 4.30% before pulling back later in the week.
- Minutes from the July FOMC meeting were released on Wednesday and reflected a divided committee in terms of future rate moves. Some members expressed continued concern about inflationary pressure, while other members mentioned the risks of pushing interest rates too far.
- The recent rise in rates has helped to steepen the yield curve. The inversion between the 2- and 10-year U.S. Treasury continues to decline from earlier levels this year, standing at -68 basis points on Friday.
- Mortgage rates hit a 20-year high this week, rising to 7.09% for a 30-year mortgage according to Freddie Mac.
