

Capital Markets Snapshot

Week ending December 29, 2023

The markets received a holiday gift over the last two months of 2023 with a decline in interest rates and surging equity performance, which helped investors recover from a disappointing 2022. In a year where inflation and interest rates were a top concern, comments from the Federal Reserve in recent weeks have led many investors to believe that the FOMC is done with rate increases and are now looking for interest rate cuts in 2024.

Fixed Income Markets Overview

- Bond yields had a rollercoaster ride this year with the 10-year U.S. Treasury closing the year at 3.88%, the exact rate where it was one year ago. In October, the yield had reached a high of over 5.00% but has come down in recent weeks.
- The 2-year U.S. Treasury yield fell to 4.25% on Friday, down from 4.42% at the start of the year. The 30-year U.S. Treasury yield closed the year at 4.03%, up from 3.97% one year prior.
- 30-year mortgage rates closed the year at 6.61% according to Freddie Mac but had reached as high as 7.79% in mid-October. The increase in rates did not drive down prices as housing supply remains an issue in the U.S. Redfin reported the average median sales price in 2023 was \$409,000, the highest in history.

Alternative Markets Overview

- After two years of negative returns, gold had a strong year finishing up by 12.8% and staying above the key \$2,000 an ounce level. The price rallied in the last few weeks of the year due in part to the outlook for lower interest rates.
- The price of oil also had a volatile year, but the price per barrel fell during the last part of the year to close at \$77 per barrel on news of ample inventories. For the year, the price per barrel was down 2.0%.
- Bitcoin had an impressive gain of more than 150% for the year as investors became optimistic about the potential for an SEC approval of bitcoin ETFs.
